Dear Sir/Madam,

January 21 2007

Re: Patent application number 09/830007

About a week ago I contacted the USPTO about the above patent application "A method of Compressing Data and Compressible Devices" to see when it might be coming up for examination. I was told by someone in the PCT section that it appears to have been abandoned for not replying to an office action.

I was not aware of this, not having heard from the attorneys Davis and Bujold who should have received this office action. I am intending to revive this application and would appreciate any advice on how to proceed with this. I will also be contacting Davis and Bujold to see what happened.

Regards,

Greg Orme.
